DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to a method of making an electrode, classified in class 438, subclass 597.
 - II. Claims 21-42, drawn to a method of making a transparent electrode for LED, classified in class 438, subclass 22+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, the two electrodes are different in that one is specifically for an LED and the other could be for another type of device like a capacitor, etc..
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Kimberly V. Perry on 9/30/02 to request an oral election to the above restriction requirement, but did not result in an election being made

Art Unit: 2812

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
